# SAHARA MOTORS GROUP

The 2025 Toyota RAV4 LE Hybrid 2.5L AWD Automatic is an advanced and fuel-efficient SUV that offers a perfect combination of power, performance, and modern technology. The exterior features include 17" alloy wheels fitted with 225/65R17 tires, LED projector headlights, daytime running lights (DRL) for improved visibility, and coloured, powered outside rearview mirrors with turn signal lights (TSL). A rear spoiler adds to its sporty look, while coloured outside door handles blend seamlessly with the vehicle's design.

Inside, the cabin offers a premium driving experience with fabric seats that provide comfort and durability, along with a driver seat vertical adjuster for customized seating. The telescopic steering wheel with multi-functional controls allows easy access to various features without distraction. The 4.2-inch multi-information display provides essential driving data, while the automatic air conditioning system with independent controls for the driver and passenger ensures a comfortable ride. Rear passengers also benefit from the rear A/C duct, ensuring efficient cooling throughout the cabin. The front passenger door lock, sun visors with illuminated vanity mirrors, and 8-inch display audio touchscreen with Apple CarPlay integration enhance convenience and entertainment. A 6-speaker audio system delivers high-quality sound for an enjoyable in-car experience.

In terms of safety and convenience, the RAV4 LE Hybrid is packed with advanced features, including cruise control, drive mode select (Eco/Normal/Sport), and a rear camera for improved visibility while reversing. The airbag system, including driver, front passenger, knee, side, and curtain airbags, provides maximum protection in case of an impact. Additional safety measures include an electric parking brake (EPB) with brake hold system, anti-lock braking system (ABS) for better braking efficiency, vehicle stability control (VSC) to prevent skidding, and a tire pressure warning system (TPWS) that alerts the driver in case of low tire pressure. The anti-theft system with an engine immobilizer ensures security, while hill-start assist control (HAC) helps prevent rollback on inclines.
