SAHARA MOTORS FZE

The 2026 Lexus NX350 Elite is powered by a 2.4L turbocharged 4-cylinder, 16-valve DOHC engine that produces 275 HP at 6,000 RPM and 430 Nm of torque between 1,700 and 3,600 RPM. It comes with an 8-speed automatic transmission and an all-wheel-drive system. The NX350 features Eco, Normal and Sport driving modes, along with front strut and rear double-wishbone suspension. Braking is handled by 17-inch disc brakes at the front and rear, while the 55-liter fuel tank supports everyday driving.

Inside, the NX350 Elite offers a 5-seat cabin with synthetic leather seat covers and a range of comfort-focused features. Both the driver and passenger seats have 8-way power adjustment, with a 2-way power lumbar adjustment for the driver. The cabin includes dual-zone automatic air conditioning, active noise control, an electrochromic inside rear-view mirror, smart key entry, push-button starting and a leather steering wheel with paddle shifters. A tilt-and-slide moon roof, wireless charger, USB charger, illuminated entry system and power back door add further convenience.

The exterior features 20-inch 235/50R20 EMT tyres, a body kit, LED daytime running lamps, projector headlamps with auto high beam, front and rear fog lamps, roof rails and a rear spoiler. Electrochromic outside mirrors include integrated turn signals. For parking and driver assistance, the NX350 has a back guide monitor, parking support alert and brake with object and vehicle detection, blind spot monitoring and Safe Exit Alert. Lexus Safety System includes Pre-Collision System, Dynamic Radar Cruise Control, Lane Departure Alert, Lane Change Assist and Lane Tracing Assist. The vehicle measures 4660 × 1865 × 1670 mm, with a 2690 mm wheelbase, 195 mm ground clearance and a gross vehicle weight of 2370 kg.
